Contract Series
Specialty Shading Solution

A Pocket For Every Shade

Retain design integrity with complete window-to-wall recessed shade pocket systems from Rollease Acmeda Contract. Designed to meet today's commercial project needs, our shade pocket systems are made with high-strength aluminum that is both workable and resistant to corrosion.

Constructed to work with Rollease Acmeda Contract Series motorized or manual shade systems, the simple pocket design can also be paired with other shading systems while still allowing shades to seamlessly disappear.

"Rollease Acmeda Ceiling Pockets are easy to install and add a completed look to any shading project."

Ceiling Pockets

One Series, Infinite Possibilities

AP Series Ceiling Pocket Family

The AP Series ceiling pocket family from Rollease Acmeda Contract are our all-purpose solution for recessed shading applications.

These pockets are the smart choice for flexibility and adaptability for your next commercial project.

Size options include square 4”, 5” and 6” models, as well as a a rectangular 7”x 9” version. All sizes are available with or without a ceiling tile lip for drop-ceiling integration.

All options are constructed of aluminum and are offered in a powder-coated white, with the 4” and 5” model also available in an anodized finish.

Additional
Closure Options

Accessories & Options

To complete the appearance of Rollease Acmeda Contract pockets, we offer end plates and removable bottom closures to deliver a finished, sleek look while providing easy access to shades after installation.

Resources & Support

Visit rolleaseacmedacontract.com to download support materials such as: technical condition drawings, assembly and installation manuals, cut sheets, training videos and more.

Bottom Closures

Bottom closures are available for the AP Series and traditional ceiling pockets. Four widths are available (2”, 3”, 4”, and 5” returns) for single and dual shade applications. Bottom closures hide the shades when looking directly up from below.

Bottom closures match the aesthetic of the ceiling pockets and are easy to install or remove for maintenance.

These aluminum bottom closures allow for on-site cutting without compromising the integrity of the structure.

End Plates

For projects with pockets that are in plain view, install the proper metal end plates to give the pocket a finished look.

Additional Options

Internal Wire Guide

For complex shading systems

Internal wire guides are available for more complex shading solutions.

Edge Side Channels

Improve light block

Improve room blackout conditions using edge side channels.
