Nice Surveillance Cameras

Offering advancements in camera technology the Nice surveillance cameras include superior night vision, defender technology, as well as an onboard mic and speaker. Upgraded technological features make the NVR software and surveillance experience a winning solution! The full surveillance line includes turret, bullet, and dome models, as well as a PTZ. The 4-megapixel models offer the best-in-class features including deterrent technology. The 8 megapixel models include red/blue lights deterrent, improved analytics, and image quality. The PTZ camera offers 5x optical zoom, person and vehicle auto-tracking, and audio/visual deterrents.

1 Adaptive Night Color

When dark, the IR will turn on for basic night vision. When a target is detected from the onboard analytics, the white light turns on, enabling full color. IR light reactivates once the target leaves to minimize light pollution for your home.

2 Onboard Mic and Speaker

With the onboard microphone, record audio from the software NVR. Use the onboard speaker to enable the camera for two-way talk from any interface, local or remote. Only with the power of ELAN OS, making your world easier.

3 Onboard Analytics

Our advanced motion detection technology offers precise target identification, distinguishing between vehicles and humans with exceptional accuracy. By focusing on these specific targets, it reduces false alarms and ensures reliable monitoring, making it ideal for diverse security scenarios. For motion, person, vehicle, tripwire (8MP adds cycle and people counting).

Deterrent technology

When an event is triggered, the camera can flash onboard lights, alerting the person that they are being watched.

On applicable SKU's (8MP/PTZ), the onboard red and bue lights can be strobed. An audible alert can also be broadcast, further alerting an intruder for a more impactful alert.
